

For Immediate Release

CSI expands Mining services!

Birmingham, AL - September 1, 2009

Casualty & Surety, Inc. continues to expand our Mining capabilities by contracting an admitted market with a dedicated appetite for Mining Workers' Compensation. The carrier is rated A+ FSC 10 by AM Best and a member of the W.R. Berkley Group and will compliment our existing mining carrier group.

This carrier will write a broad range of coverages such as General Liability, Auto Liability and Workers' Compensation for all types of mining accounts, to include monoline Workers' Compensation for Trucking. This carrier is active in many states but is targeting MT, ID, NV, AZ, NM, IL, IN, MO, OK, OR, CO, UT, KS and AR. CSI will represent this carrier in all of these states.

Again, this is a great addition to our existing mining program and will allow us to thoroughly service our mining accounts in every way. The program has a minimum premium of between \$3,500 to \$5,000 for Workers' Compensation which will enable us to work with the small mining companies as well as larger accounts.

Highlights of the new program are as follows:

- ◆ All lines of coverage available except Property/IM
- ◆ Deductibles begin at \$0
- ◆ Easy application process
- ◆ Underground and Surface mining for all minerals except Uranium

Our goal is to continue to grow and become more of an asset to your operation. We are striving hard at doing just that on a daily basis to bring you the best possible Mining product available.

Thank you again for your business and support. For more detailed information please contact:
